

Monthly Performance Tracking

Solar PV customers are encouraged to track their monthly performance. Please check your inverter screen once a month and record the **E-Total** value off the inverter. Subtract the difference between this month and last month to get your monthly production data. You can compare this **ACTUAL** production value against your **ESTIMATED** production value to see if your solar is working properly.

YEAR	Date / Time (measure in consistent intervals)	E-Total (from inverter)	Monthly kWh (E-total previous month MINUS E-total from current month)
January			
February			
March			
April			
May			
June			
July			
August			
September			
October			
November			
December
